## **Introduction**

The code listings presented in this volume are designed to facilitate accurate and rapid coding of all postsecondary institutions indicated as attended by respondents to the Survey of Earned Doctorates (SED). The listings include codes for all known postsecondary institutions in all countries presently included in the SED database. Universities, colleges and technical institutes which have not been cited by doctoral recipients may not be listed. Institutional code assignments are presented for each country — with name variations, where appropriate — corresponding to the codes described in Chapters 2 and 3 of Volume 1 of this data series, *Mapping the World of Education: The Comparative Database System — Volume 1: Overview, Description and Coding Structure*. For program completion awards offered by the institutions listed in Volume 3, please consult *Mapping the World of Education: The Comparative Database System — Volume 2: Program Completion Award Codes*.

Even if a country is not known to possess any postsecondary education institutions, it must still be listed and assigned "other" and "unknown" codes in order to capture any possible responses — errors or otherwise. Countries are listed in the order in which they appear in the country subcode list.

U.S. postsecondary institutions make autonomous decisions regarding qualifications for admission of students, and their practices and the general professional guidelines they use permit a wide range of qualifications to be considered. The range of possibilities means that overseas students studying in the United States may present academic backgrounds from many different types of foreign institutions, not limited to universities or institutions deemed equivalent to universities under the laws and policies of the home country. For this reason the institutional codes listed in this Volume include all the known institutions in each country that SED respondents have indicated attending, regardless of level or type.

In many cases respondents to SED who are not U.S. citizens or permanent residents have attended other U.S. postsecondary institutions prior to undertaking doctoral studies. In such cases the response should be coded using the appropriate U.S. institutional code. Since the U.S. institutions are coded under the same system as other institutions, neither accuracy nor comparability is sacrificed.

For those cases where SED respondents —whether U.S. citizens or residents or not — report attending and graduating from foreign institutions, those institutions should be coded using the appropriate codes from the lists presented in this Volume.
